About me

Driven Full Stack Developer with hands-on experience building real-world web applications using Laravel, Angular, React.js, Node.js, Express.js, MySQL, and MongoDB. Proficient in developing scalable RESTful APIs, responsive frontend interfaces, and database-driven applications. Experienced in implementing secure authentication, role-based access control, API integrations, and end-to-end frontend-backend functionality. Successfully contributed to full-stack projects using both Laravel–Angular–MySQL and MERN technologies. Strong problem-solving skills, clean coding practices, and a commitment to building reliable, user-focused software solutions.

Education

Eastern University Sri Lanka, Trincomalee Campus

2023-2026

Bachelor of Computer Science.

Laxapana central collage

2021

G.C.E Advanced Level (Combined mathematics - C , Chemistry - C , Physics - C)

Professional Experience

Full Stack Developer Intern

DI 11 Soft May 2026 – Present

- Developed and maintained full-stack business applications using **Angular, Laravel, MySQL, TypeScript, and RESTful APIs**.
- Contributed to a **Distribution Management System (DMS)**, implementing sales and billing, inventory, load management, finance, reporting, customer management, and role-based access features.
- Contributed to a **Hotel Management System (HMS)**, developing hotel configuration, room management, reservations, billing, payments, reporting, staff roles, and permission-based functionality.
- Developed and integrated RESTful APIs and implemented frontend-backend data flows for production-oriented business modules.
- Performed bug fixing, maintenance, API testing, database troubleshooting, and feature development across multiple software projects.
- Used **Git, GitHub, Postman, Laravel, Angular, and MySQL** within collaborative development workflows.
- Fixed bugs and contributed to the ongoing development of the **dsn-alaris-to-zoho-invoice-data-automation-system** integration pipeline.

Projects

Technova CMS – Computer Shop Management System

02/2026 – 03/2026

- Developed a full-stack computer shop management system for inventory, sales, customers, and supplier management.
- Implemented secure JWT authentication and role-based access control.
- Built responsive dashboards with sales analytics, reporting, and stock monitoring.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB.
- **Technologies:** React.js, Redux Toolkit, Material UI, Node.js, Express.js, MongoDB, JWT, Axios.

Tour & Travel Booking Website

04/2025 – 06/2025

- Developed a full-stack travel booking platform for exploring and managing travel packages.
- Implemented JWT authentication with role-based access for users and administrators.
- Built a booking management system with real-time package updates and management.
- Integrated image uploads and user review and rating functionality.
- **Technologies:** MongoDB Atlas, Node.js, Express.js, JWT.

WhatsApp AI Chatbot

04/2025 – 05/2025

- Developed an AI-powered WhatsApp chatbot using NestJS and OpenAI models for real-time user interactions.
- Integrated the WhatsApp Cloud API and webhooks for automated message handling.
- Built a modular TypeScript backend with separate AI and messaging services.
- Implemented unit testing and secure environment-based configuration.
- **Technologies:** NestJS, TypeScript, OpenAI API, WhatsApp Cloud API, Webhooks, Jest, dotenv.

Student Result Management System

04/2025

- Developed a web application for managing and publishing student examination results.
- Implemented role-based access control for administrators, teachers, and students.
- Built backend functionality for student and result management using PHP and MySQL.
- Designed a responsive user interface using Bootstrap 5.
- **Technologies:** HTML, CSS, JavaScript, PHP, MySQL, XAMPP, Bootstrap 5.

Full-Stack Car Marketplace Website

03/2025 – 04/2025

- Developed a full-stack marketplace for buying and selling new and used vehicles.
- Implemented authentication, database management, image uploads, and real-time buyer-seller messaging.
- Built advanced vehicle search and filtering functionality.
- Designed a responsive interface using Tailwind CSS and ShadCN UI.
- **Technologies:** Next.js, Appwrite, SendBird, TanStack Query, React Hook Form, Zod, Tailwind CSS, ShadCN UI, Vercel.

Technical Skills

- **Backend Development:** Laravel, Node.js, TypeScript, Express.js, RESTful APIs
- **Frontend Exposure:** Angular, React
- **Databases :**MySQL, MongoDB, PostgreSQL, SQL Query Optimization
- **Enterprise Systems and Security:** JWT, OAuth2, Data Security Protocols, User Access Management
- **Tools and Collaboration:** Git, GitHub, Postman

Certifications

- Web Design for Beginners University of Moratuwa - [web Design](#)
- Front-End Web Development University of Moratuwa [frontend](#)
- Server-side Web Programming University of Moratuwa [backend](#)
- Programming in Python-1.University of Moratuwa [python](#)
- DP Education React Course [React](#)
- Node js [udemy](#)
